Education

Degree	Institute/College	CGPA	YOP
B.Tech in Computer Science	SRKR Engineering College, Bhimavaram	8.08/10.0 (Till 6th semester)	May 2026
Diploma in Computer Science	MBTS GOVT. College, Guntur	89%	May 2023

Work Experience

Full Stack Developer Intern – **LabFox.Studio**, Remote **Jul 2025 – Present**

- Contribute to the backend architecture leveraging **FastAPI**, **Kafka** and **LangGraph** to power **RAG** features.
- Developed comprehensive APIs to integrate data from open-source DataHub SDKs, REST OpenAPIs, and GraphQL endpoints, resulting in 30–40% improved API response times.
- Implemented scalable dataset processing pipelines through strategic chunking and optimized retrieval workflows.

Freelance Full Stack Developer – **Self-Employed** **Jul 2025 – Present**

- Developed a serverless e-commerce platform and architected robust cloud infrastructure using **AWS Lambda**, **S3**, and **CloudFormation** for scalability and efficient resource management.
- Integrated **Redis** for backend caching and Cloudflare for global CDN and DNS management, improving performance.

Projects

Code Indexer | Repo | *LlamaIndex, FAISS, Tree-sitter, LRU cache, and FastAPI* **Sep 2025**

- Built a code indexing and retrieval system using **LlamaIndex** and the **FAISS** vector database to enable fast, semantic search of codebases. Implemented chunking and querying pipelines to optimize code parsing.
- Implemented **Retrieval-Augmented Generation** workflows to enhance context-aware code query responses.

CodeQuest | Live | *React.js, Typescript, Node.js, Express.js, MongoDB and Docker* **Apr 2025**

- Designed and implemented a daily Problem of the Day (POTD) platform that delivers curated coding challenges and tracks user performance through personal profiles and real-time leaderboards.
- Engineered the **profile linkage and automated synchronization** of user statistics across Leetcode, Codeforces, GFG, and CodeChef, which eliminated 95% of manual profile updates.
- Implemented **Type-sense** search for 100% quick and precise identification of user profiles and challenges.

AI Yoga Assistant | Demo | *React.js, Node.js and TensorFlow Move-Net* **Sep 2024**

- Participated in the creation of an AI Yoga Assistant that provided users with personalized feedback and real-time pose detection using **move-net model** with an accuracy of 89%.

Skills

Languages:	C, C++, Python, Java, JavaScript, TypeScript
Technologies/Frameworks:	React, Next, Express, Node, FastAPI, LangChain, LlamaIndex, FAISS
Databases:	MongoDB, MySQL, PostgreSQL, Redis, ChromaDB
Tools:	Git, Docker, Linux, AWS (Lambda, S3, CloudWatch, CloudFormation), Cloudflare
Others:	Data Structures and Algorithms, Machine Learning, RAG, Serverless Architecture

Certificates

- Summer Training Program by GFG
- Google Cloud Career by Google Cloud
- Vedic Vision Hackathon by SRKR
- Winter Coding Contest 4.0 by VNRVJIET

Achievements

- Pupil (1350+) rated on Codeforces (Max Rating: 1397).
- Achieved global rank under 1000 on CodeChef more than 5 times (Best: 37 in Div-3).
- Secured 3rd place in Vedic Vision Hackathon conducted by SRKREC among 70+ teams.
- Currently 4th rank in GeeksforGeeks over 3000+ students in SRKR Institution.

Extra-Curricular Activities

- **Technical Lead, SRKR Coding Club** – Responsible for coordinating technical activities, reporting team status, and monitoring club project progress.
- **Manager, CodeQuest** – Managing daily operations of the POTD event by curating and publishing coding challenges, evaluating user submissions, and sharing structured solutions to encourage consistent learning and engagement.
